

# Border detection of illicit drugs and precursors by highly accurate electrosensors

The ultimate research aim of the BorderSens project (grant agreement No 833787) is to develop a portable, wireless single prototype device with capability to test for different types of drugs, precursors and adulterants/cutting agents within 45 seconds, with outstanding accuracy and reduced false positives and false negatives.

## Consortium

**Funding programme:**  
H2020 (topic SU-SEC-2018)

**Total budget:**  
€5,504,415

**Duration:**  
September 2019 – August 2023
